

The Weyiiletpuu language a cross with cayuse and Nez Perce.

Kristen Parr, a language instructor and linguistics expert from the CTUIR has generously shared an initial set of translations for native plant names. You are welcome to use this language and audio recordings in HCD 101 prototypes. The language represents the intellectual property of the CTUIR. We will create prototypes and gather public feedback. Any future production and broader publication beyond our class will be done only with collaboration and consent of the CTUIR.

Common name

Scientific name

Indigenous name in Weyiiletpuu
